

WHY SHOULD YOU CHOOSE AMERICAN DISCOUNT PHARMACY OVER IMPORTING MEDICATIONS FROM CANADA?

1. Our business model is based on providing our customers the best price possible on all of our products. We have over 1000 generics posted with discount prices. Canadian drug companies have a difficult time competing on our generic prices. Our company charges a fee similar to a dispensing fee versus adding a huge mark-up on the prescription product.
2. Our brand name products are priced the same as our generic counterparts. Even though we have some of the best US-based prices on the brand name products, Canadian pharmacies have lower prices, in some instances, on brand-name medications. This is because the Canadian government sets price controls with the pharmaceutical companies. But, our brand-name products are FDA-approved and many tablet, non-extended release forms can be split. This can provide huge savings.
3. Both our generic and brand name medications are FDA-approved. Thus, there is an inherent risk of counterfeit products or “bad” products from importation. Why take the chance? You could be risking your life in order to save a few dollars on these brand-name medications. So, we have an alternative on many of these medications. Just request “Double Strength” from your Doctor or check “Double Strength” on our Prescription Order Form and let us do the rest for FREE.
4. What does checking “Double Strength” do? If a medication is able to be split per the package insert for the product, the Doctor authorizes the change, and it is a non-control product, American Discount Pharmacy may be able to dispense up to 180-day supply for regular dose schedules of the medication for the price of a 90-day supply. For example, if you pay around 270 dollars from a Canadian pharmacy for Lipitor 40 mg and you request our service; we would recommend asking the Doctor for a prescription for Lipitor 80 mg, 90 tables, Take ½ or 40mg once daily. Then, for roughly 368 dollars, you now have a 180-day supply and a FDA-approved medication. It brings the cost down to 184 dollars per 90-day supply. This can be done with medications such as Viagra and generic Imitrex also. So, if you don't mind splitting these tablets; there are cost savings available. ***PLEASE REVIEW “REQUIREMENTS FOR AUTHORIZATION ON SPLITTING TABLETS” BEFORE REQUESTING “DOUBLE STRENGTH” ON THE PRESCRIPTION ORDER FORM. PLEASE MAKE SURE YOU HAVE A PILL SPLITTER AVAILABLE AND KNOW HOW TO USE IT PROPERLY. WE SELL THESE ON OUR PRESCRIPTION ORDER FORM AND HAVE INSTRUCTIONS FOR USE UNDER “INSTRUCTIONS ON SPLITTING TABLETS.”***

5. If you wish to compare prices with a Canadian pharmacy, just type in americandiscountpharmacy.com instead of our website americandiscountpharmacy.NET. Shortly after becoming incorporated and posting our price list, a Canadian website purchased the domain name americandiscountpharmacy.COM. We would like you to compare our prices on your products. We believe you will be surprised at our prices for the FDA-approved products. Thank you from American Discount Pharmacy for keeping jobs within the United States. We appreciate your business.
